Zentora Robotics Pvt Ltd - Company Handbook

This is a fictional document created only for testing retrieval systems. All names, numbers and dates are invented.

1. Company Overview

Zentora Robotics Pvt Ltd was founded on 14 March 2017 by Meera Iyer and Arvind Kothari. Meera Iyer serves as Chief Executive Officer, and Arvind Kothari serves as Chief Technology Officer. The company builds agricultural robots and field sensors for small and mid-sized farms. Its headquarters are in Mysuru, Karnataka. As of December 2025, Zentora employed 312 people, and its revenue for fiscal year 2025 was 148 crore rupees.

2. History and Milestones

The first prototype, called Sprout-0, was a hand-pushed weeding cart tested on a two-acre trial farm in 2017. In 2019 the company shipped its first commercial product, the AgriBot K1, and sold 61 units in the first year. The K1 was replaced by the AgriBot K2 in 2022. In 2021 Zentora opened its research and development lab in Pune, where the vision and navigation team works. In 2023 the company opened a sales office in Rotterdam, Netherlands, to serve European customers.

Zentora raised a Series A round of 22 million US dollars in September 2022, led by an investor named Lakeshore Ventures. The company has not raised any later round as of the date of this handbook.

3. Offices

Location	Role	Opened
Mysuru, India	Headquarters, manufacturing, support centre	2017
Pune, India	Research and development lab	2021
Rotterdam, Netherlands	European sales office	2023

4. Mission and Values

Zentora's stated mission is to cut manual weeding labour on small farms by half within ten years. The company lists four values: field-first design, honest pricing, repairable hardware, and open data. The value called repairable hardware means every Zentora product must be serviceable with standard tools and spare parts must be available for at least seven years after a model is discontinued.

5. Product Catalogue

Zentora sold three products in 2026. The table below lists their main specifications and prices.

Product	Purpose	Key specifications	Price (INR)
AgriBot K2	Autonomous weeding robot	Weight 42 kg, battery life 8 hours, covers 1.5 acres per charge	3,85,000
HarvestMate H5	Tomato and chilli harvesting arm	Picks 900 kg per hour, 6 axes, works on rows 90 cm wide or more	6,40,000
SoilSense S1	In-ground soil sensor	5 probes, measures moisture, pH and nitrogen, battery lasts 14 months	18,500

6. Warranty Policy

The AgriBot K2 carries a warranty of 24 months. The HarvestMate H5 carries a warranty of 18 months, and the SoilSense S1 carries a warranty of 12 months. The lithium battery packs used in the K2 and H5 are covered separately for only 6 months, regardless of the main product warranty. Damage caused by flooding above 30 cm, by chemical spray directly on the electronics, or by opening the sealed controller unit is not covered.

7. Customer Support

Customers can reach the support centre in Mysuru by phone on the toll-free number 1800-555-0142, Monday to Saturday, from 8:00 am to 8:00 pm India time. Support tickets are classified by severity. A Critical ticket, meaning a robot is stopped in the field during harvest, receives a first response within 4 hours. A Normal ticket receives a response within 2 business days. Zentora offers an on-site repair visit free of charge during the warranty period, but only within 150 km of Mysuru or Pune. Outside that range, the customer pays a travel fee of 12 rupees per kilometre.

8. Software Updates

Firmware for all robots is released quarterly, in January, April, July and October. The current firmware line is version 4.x. Updates are delivered over Wi-Fi, and a robot must have at least 60 percent battery to start an update. If an update fails, the robot automatically rolls back to the previous version.

9. Leave and Working Hours Policy

Full-time employees receive 24 days of paid leave per year, and up to 10 unused days may be carried forward into the next year. Sick leave is separate and is limited to 8 days per year. Maternity leave is 26 weeks, and paternity leave is 10 days. Core working hours are 10:00 am to 4:00 pm. Employees may work remotely up to 3 days per week, but only after completing a 90-day probation period.

10. Expense and Travel Policy

Domestic flights must be booked in economy class at least 7 days in advance. Hotel stays are reimbursed up to 4,500 rupees per night in metro cities and 3,000 rupees per night elsewhere. Any single expense above 25,000 rupees needs written approval from a department head before it is incurred. Receipts must be submitted within 15 days of the expense.

11. Information Security

All employees must report a suspected security incident to the security team by email at security@zentora-example.com within 2 hours of noticing it. Laptops must use full-disk encryption, and passwords must be at least 14 characters long. Multi-factor authentication is mandatory for all company accounts.

The company is currently running an internal programme named Project Lantern. Its goal is to migrate all customer telemetry data to a new cloud region. The migration cut-over is scheduled for 15 January 2027, and the programme is led by the Pune R&D; lab.

12. Frequently Asked Questions

Can a customer upgrade from the K1 to the K2? Yes. Owners of an AgriBot K1 receive a trade-in credit of 40,000 rupees towards a new K2, valid until 31 December 2026.

Does Zentora sell its robots in Europe? Yes, through the Rotterdam sales office, which handles all European orders.

Is farm data shared with third parties? No. Under the open data value, customers own their data and may export it at any time in CSV format.
